

MAXIM™

MAXIM™

Pull-Tab Vending Machines

At American Games, superior quality is our goal. We have continually provided the market with the most advanced Pull-Tab Vending Machines (PTVMs). Since the early 1990s, American Games, has supplied thousands of PTVMs that have vended billions of secure gaming products to players worldwide. Whether it be in the Lottery industry or the Charitable Gaming industry, our Maxim™ machines continue to offer the ultimate in speed, capacity, simplicity, flexibility and security.

SPEED • The Maxim™ vending speed has consistently been among the top in the market, allowing more purchases in a shorter amount of time and ultimately increases sales.

CAPACITY • The Maxim™ offers high capacity and ease of use in a relatively small machine. The largest model, the Maxim™ 8400, is the largest-capacity ticket vending machine on the market, despite having one of the smallest footprints.

SIMPLICITY • The Maxim™ boasts a very simple ticket loading procedure. Interchangeable ticket columns are accessed and loaded from the front of the machine and are easily adjusted to accommodate different ticket sizes. This eliminates downtime whenever it's necessary to change games or switch from three-tab to five-tab tickets.

FLEXIBILITY • The Maxim™ employs a “plug and play” modular design for its major components, which dramatically reduces machine downtime and service. All major components can be removed quickly without the need for special tools or training. Individual programmed ticket columns also allow for flexible pricing and a variety of options. Vital game data is entered on the machine's keypad following a logical series of prompts on the LED display.

SECURITY • Maxim™ machines are equipped with several features that have become the standard in the vending industry including: solid steel and Lexan construction, confidential PIN numbers for both managers and employees, multiple lock access, audible alarm, and a market-proven bill acceptor.

In addition to the superior quality and features, American Games' Maxim™ machines are backed by a one-year warranty and toll-free phone support. Browse through the following pages for a closer look at the Maxim™ Pull Tab Vending Machine.

AN INDUSTRY 1ST

4 COLUMN EXPANDABLE PULL-TAB VENDING MACHINE

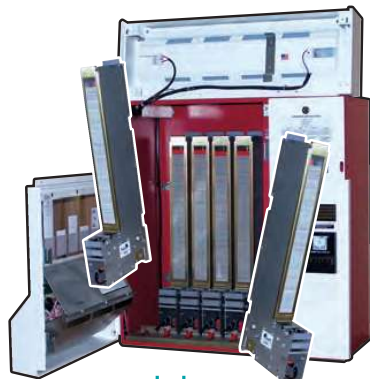

American Games is pleased to introduce the industry's first expandable Pull-Tab Vending Machine (PTVM). Having produced PTVMs for well over a decade, American Games is now ready to take aim at the 4 column vending machine market. Currently available as a 6 and 12 column vending machine, American Games is able to manipulate the best-selling 6 column PTVM and provide customers with an expandable 4 column machine.

American Games' PTVMs are constructed in a modular fashion. That is, all core components employ a "plug and play" modular design that quickly enables a 4 column machine to expand into a 6 column machine.

For those customers new to vending, the expandable 4 column PTVM is sure to be a hit! Start with a 4 column machine, see the success, and expand to a 6 column machine!

Start with a 4 Column
Machine and see
the success...

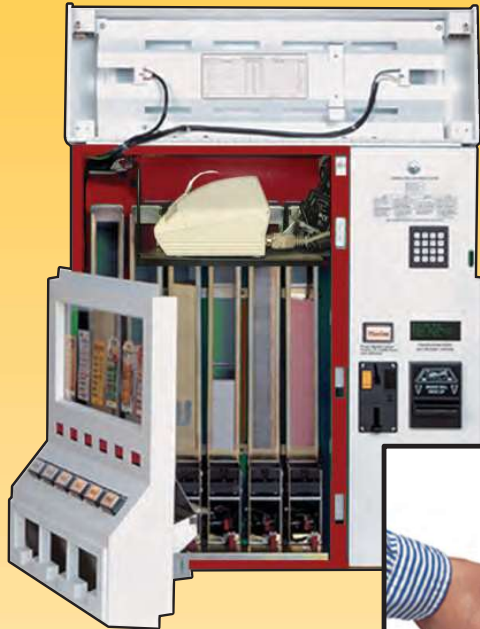

...expand the machine
into a 6 Column Machine...

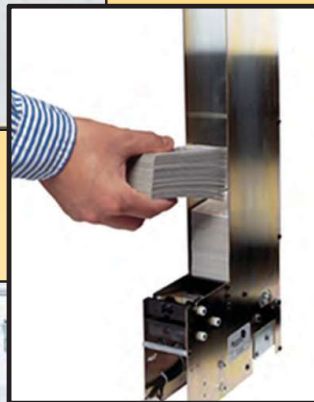

...and see even more success!

THE MECHANICS

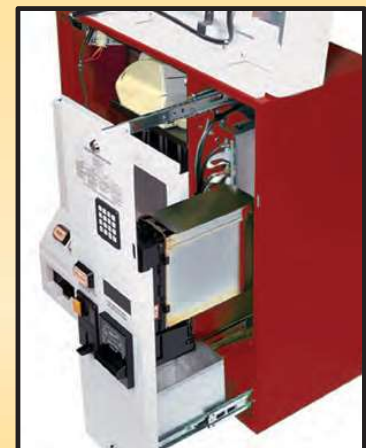

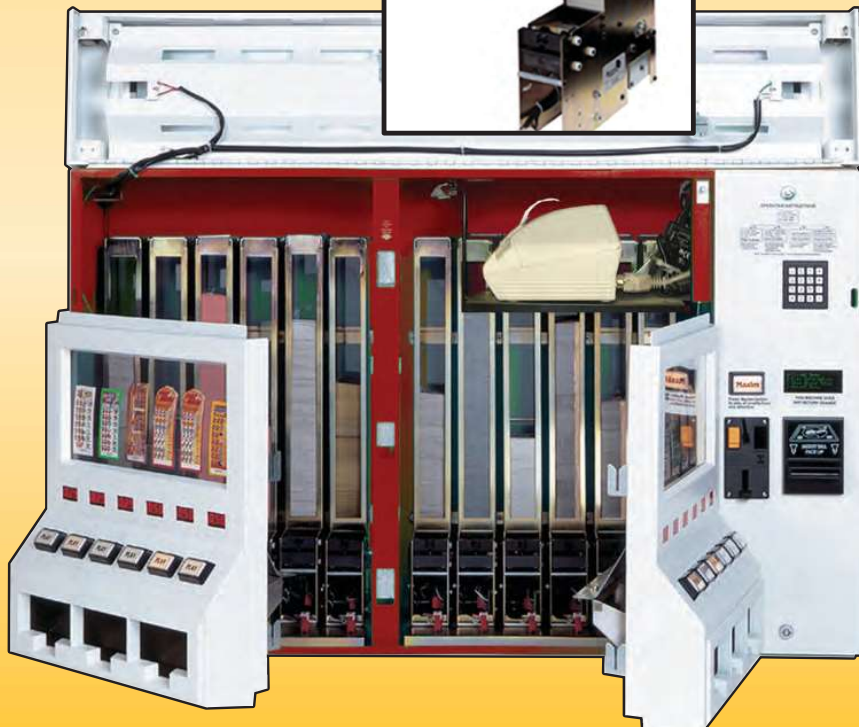

MAXIMS™ ARE DESIGNED AND BUILT AT AMERICAN GAMES

- Automatic Bin Timing calibrates each column to vend various ticket sizes, including die-cut tickets.
- Locking base cabinets available for secure storage.
- Buttons flashing in random sequence and LED price displays attract more players.
- Interchangeable ticket columns work independently to eliminate downtime.
- Front-loading tickets is now easier than ever.
- Advanced networking capabilities.

- 4 and 6 Column Maxim are wall mountable.
- Audible front-door alarm.

- Ticket and cash compartments are keyed separately
- Bill validator stacks up to 600 bills (1,000 capacity validator available)
- Easily accessible.

KEYPAD PROGRAMMING

MAXIM™ FUNCTIONS ARE SET QUICKLY AND EASILY

- Large display menu walks you through reports and ticket loading quickly and easily.
- Audit reports offer an increased level of security and accountability.
- Step-by-step programming makes Maxim functions faster and easier than ever:
 - loading tickets
 - changing prices
 - running reports
